Variable Budget Billing Program

The purpose of the Budget Billing Program is to equalize monthly payments for the member's convenience. At one time it was used only for total electric homes, but we are now able to offer this type of service to all residential members.

The Variable Budget Billing takes the previous eleven months' KWH usage, adds the current month's KWH usage and divides by 12 to obtain a monthly average KWH consumption. Those KWH's are then calculated at the current month's rate, fuel charges and applicable surcharges. The amount is then rounded to the nearest dollar, which becomes the budget amount for that month.

The member will have to meet the following requirements:

-  Twelve-month history on the account.
-  Account must be current to go on budget billing.
-  Budget amount to be paid by due date or the amount will be penalized
-  If the budget amount is not paid monthly the account will be removed form the budget billing.

If you would like more information concerning the Variable Budget Billing Program, or would like to go on the budget billing, please [contact](#) our office.
